**COVID-19 HEALTH ALERT**

Issued March 13, 2020
By: Dr. Anne Zink, Chief Medical Officer, State of Alaska

DHSS strongly advises that all Alaskans read and comply with the following CDC guidance for workplaces, schools, homes, and commercial establishments:

**Practice good hygiene:**
- Stop handshaking – use other noncontact methods of greeting.
- Clean hands at the door and schedule regular hand washing reminders by email.
- Create habits and reminders to avoid touching their faces and cover coughs and sneezes.
- Disinfect surfaces like doorknobs, tables, desks, and handrails regularly.
- Increase ventilation by opening windows when able.

**Be careful with meetings and events:**
- Use videoconferencing for meetings when possible.
- When videoconferencing not possible, hold meetings in open, well-ventilated spaces.
- Consider adjusting or postponing large meetings or gatherings.

**Special travel considerations:**
- Assess the risks of travel including the location and rapidly changing events.
- At risk individuals and communities with limited health care infrastructure or high-risk populations should considering limiting all non-essential travel.

**Handle food carefully:**
- Limit food sharing.
- Strengthen health screening for staff working with food and their close contacts.
- Ensure staff working with food and their close contacts practice strict hygiene.

**Special consideration for businesses:**
- Use booking and scheduling to stagger customer flow.
- Use online transactions where possible.
- Consider limiting attendance at larger gatherings.
- Promote tap and pay to limit handling of cash.

**For transportation businesses, taxis, and ride shares:**
- Keep windows open when possible.
- Increase ventilation.
- Regularly disinfect surfaces.
- Encourage social distancing during rides.
If you don't feel well:
• Stay at home if you are feeling sick.
• Do not go to work, out in public or around others if you have a fever and for 72 hours after your last fever.
• Consider staying at home if you have a sick family member in your home.

Households with sick family members are recommended to:
• Give sick members their own room if possible, and keep the door closed.
• Have only one family member care for them.
• Consider providing additional protections or more intensive care for household members over 65 years old or with underlying conditions.

Households with vulnerable seniors or those with significant underlying conditions:
*Significant underlying conditions include heart, lung, kidney disease; diabetes; and conditions that suppress the immune system.*
• Have the healthy people in the household conduct themselves as if they were a significant risk to the person with underlying conditions. For example, wash hands frequently before interacting with the person, such as by feeding or caring for the person.
• If possible, provide a protected space for vulnerable household members.
• Ensure all utensils and surfaces are cleaned regularly.

These recommendations are based on the CDC’s guidance, which can be found here: [www.cdc.gov/coronavirus/2019-ncov/specific-groups/high-risk-complications.html](http://www.cdc.gov/coronavirus/2019-ncov/specific-groups/high-risk-complications.html)

This is not a mandate. These recommendations are based on CDC recommendations.
