

If I were mayor I would make a lot of changes to benefit the town. The community of Talkeetna could benefit from all of these new changes in a lot of ways, and I also think that people would love some new activities to do. Some of the new ideas I would like to put into action in the town of Talkeetna would be, having some new trails, a community potluck, and also some new things like a pool, and also a clean-up crew to make the town of Talkeetna cleaner.

One new change would be to make the town of Talkeetna cleaner. I would make a new clean-up crew full of volunteers that are willing to help make the town cleaner. We could have a sign-up sheet at the post office and also there could be a social media page for helping people get interested and possibly volunteer for the crew. This would help people connect and make new friends and make relationships stronger, also it would make the town feel nicer and look better. People could benefit from something like this. It could help people get out and make the side of the roads cleaner.

The second thing I would do for the community would be to make new trails. I think having a new trail by the railroad tracks would be a great idea because people could see the Susitna river and of course the train. The town of Talkeetna has a few trails but it would be great to have more clean trails for other people to explore and see new scenery. Also, the local people could have new favorite places to go and hang out with friends. It would be a great new place to go biking, cross country running, or even walking. Additionally these new trails would bring more people into the town and bring in new revenue for the town, which could fund my other ideas.

The third thing that could help the community of Talkeetna would be to have another town activity would be to have a day where we could offer a meal to people in town so everyone would have a nice chance to fill up their tank and start a new conversation with new people and maybe even make a new friend. I know there are a good amount of people in town that could need some extra food because I can see some people in town struggling. The town could have a weekly vote for what the main course, deserts, and sides are.

A public pool would be another great idea. People could get together after a cold winter day of work and hp in a pool and warm-up. People could have intriguing interactions with other people. There could also be a list and you could put your name on it and see what day you are going to go to the pool.

People need some more things to do when they are in town, and bringing our community together with these activities will make people look different at Talkeetna in a great way. They would see it cleaner, hard-working, closely bonded, and great activities. All of these ideas that I picked are closely related to the things that the people of Talkeetna would want to be added to the community. A way to get some of these things

into action would be to get federal grants to get some of these big projects moving one by one because these things are not free. It would also be a good idea to start a go fund page to have people support the idea of these new projects by donating. All of the ideas would be possible with the town and I would look forward to putting these things into action.
